IV solution _____
at _____/hour
I&O _____ Fluid Restriction _____
Drains: _____
NG tube: ___ Setting: _____

Endocrine Function

Blood Glucose Monitoring _____

Activity & Rest

Activity _____
Assistance _____
Reposition q _____ hrs.
Teds/ Aces _____
PT _____ OT _____

Protection

Bath (type) _____
Oral Hygiene _____ Dentures _____
Dressing/wound care _____
Isolation _____

Senses

Glasses _____
Hearing Aid _____

Neurological Function

Alertness/Orientation _____
Neuro Checks _____
Communication _____

Comfort

PCA _____ Epidural _____

1) Briefly explain current medical diagnoses. Include etiology, pathology, signs and symptoms:

2) Describe the surgical procedure and post-operative nursing care (including potential post-operative complications):

Organize Plan of Care: Schedule of nursing activities (list tentative plan of care with approximate times by each activity)

Today, I especially need help with

Plan of Assessment Data To Be Collected:

Assessment Data Needed

Specific Data - list all of the data you plan to collect that is pertinent to your client.

Client's Response to Hospitalization/Family Involvement

Date	Lab and Diagnostic Tests	Normal value	Client value	Significance of Abnormal Value and Nursing Implications
